
Haygrove
HAYGROVE

BY GROWERS, FOR GROWERS

GROWING

We grow berries and cherries, some organically, over 800ha on 13 sites in 4 countries supplying leading retailers

GROWING SYSTEMS

We design and supply field-scale polytunnels, substrate systems and associated technologies to the best growers in more than 50 countries.

THE HAYGROVE STORY

A selection of highlights..

1987

Angus Davison plants 1 hectare of strawberries in Herefordshire, UK for a university project

1995

Haygrove pioneer the way covering berries with polytunnels to protect against the British summer & quickly start supplying other local farms.

2002

We start farming in South Africa to give full year supply of fresh berries to the UK supermarkets. Shortly after, 'Bright Futures' our social uplift programme begins.

2013

International Growing Systems supply is growing with people in Australia, USA, Germany, Mexico, Poland, South Africa, and others.
The first of the Community Gardens begin.

2017

Haygrove China is launched with a 20ha blueberry farm and Growing System sales

PRESENT

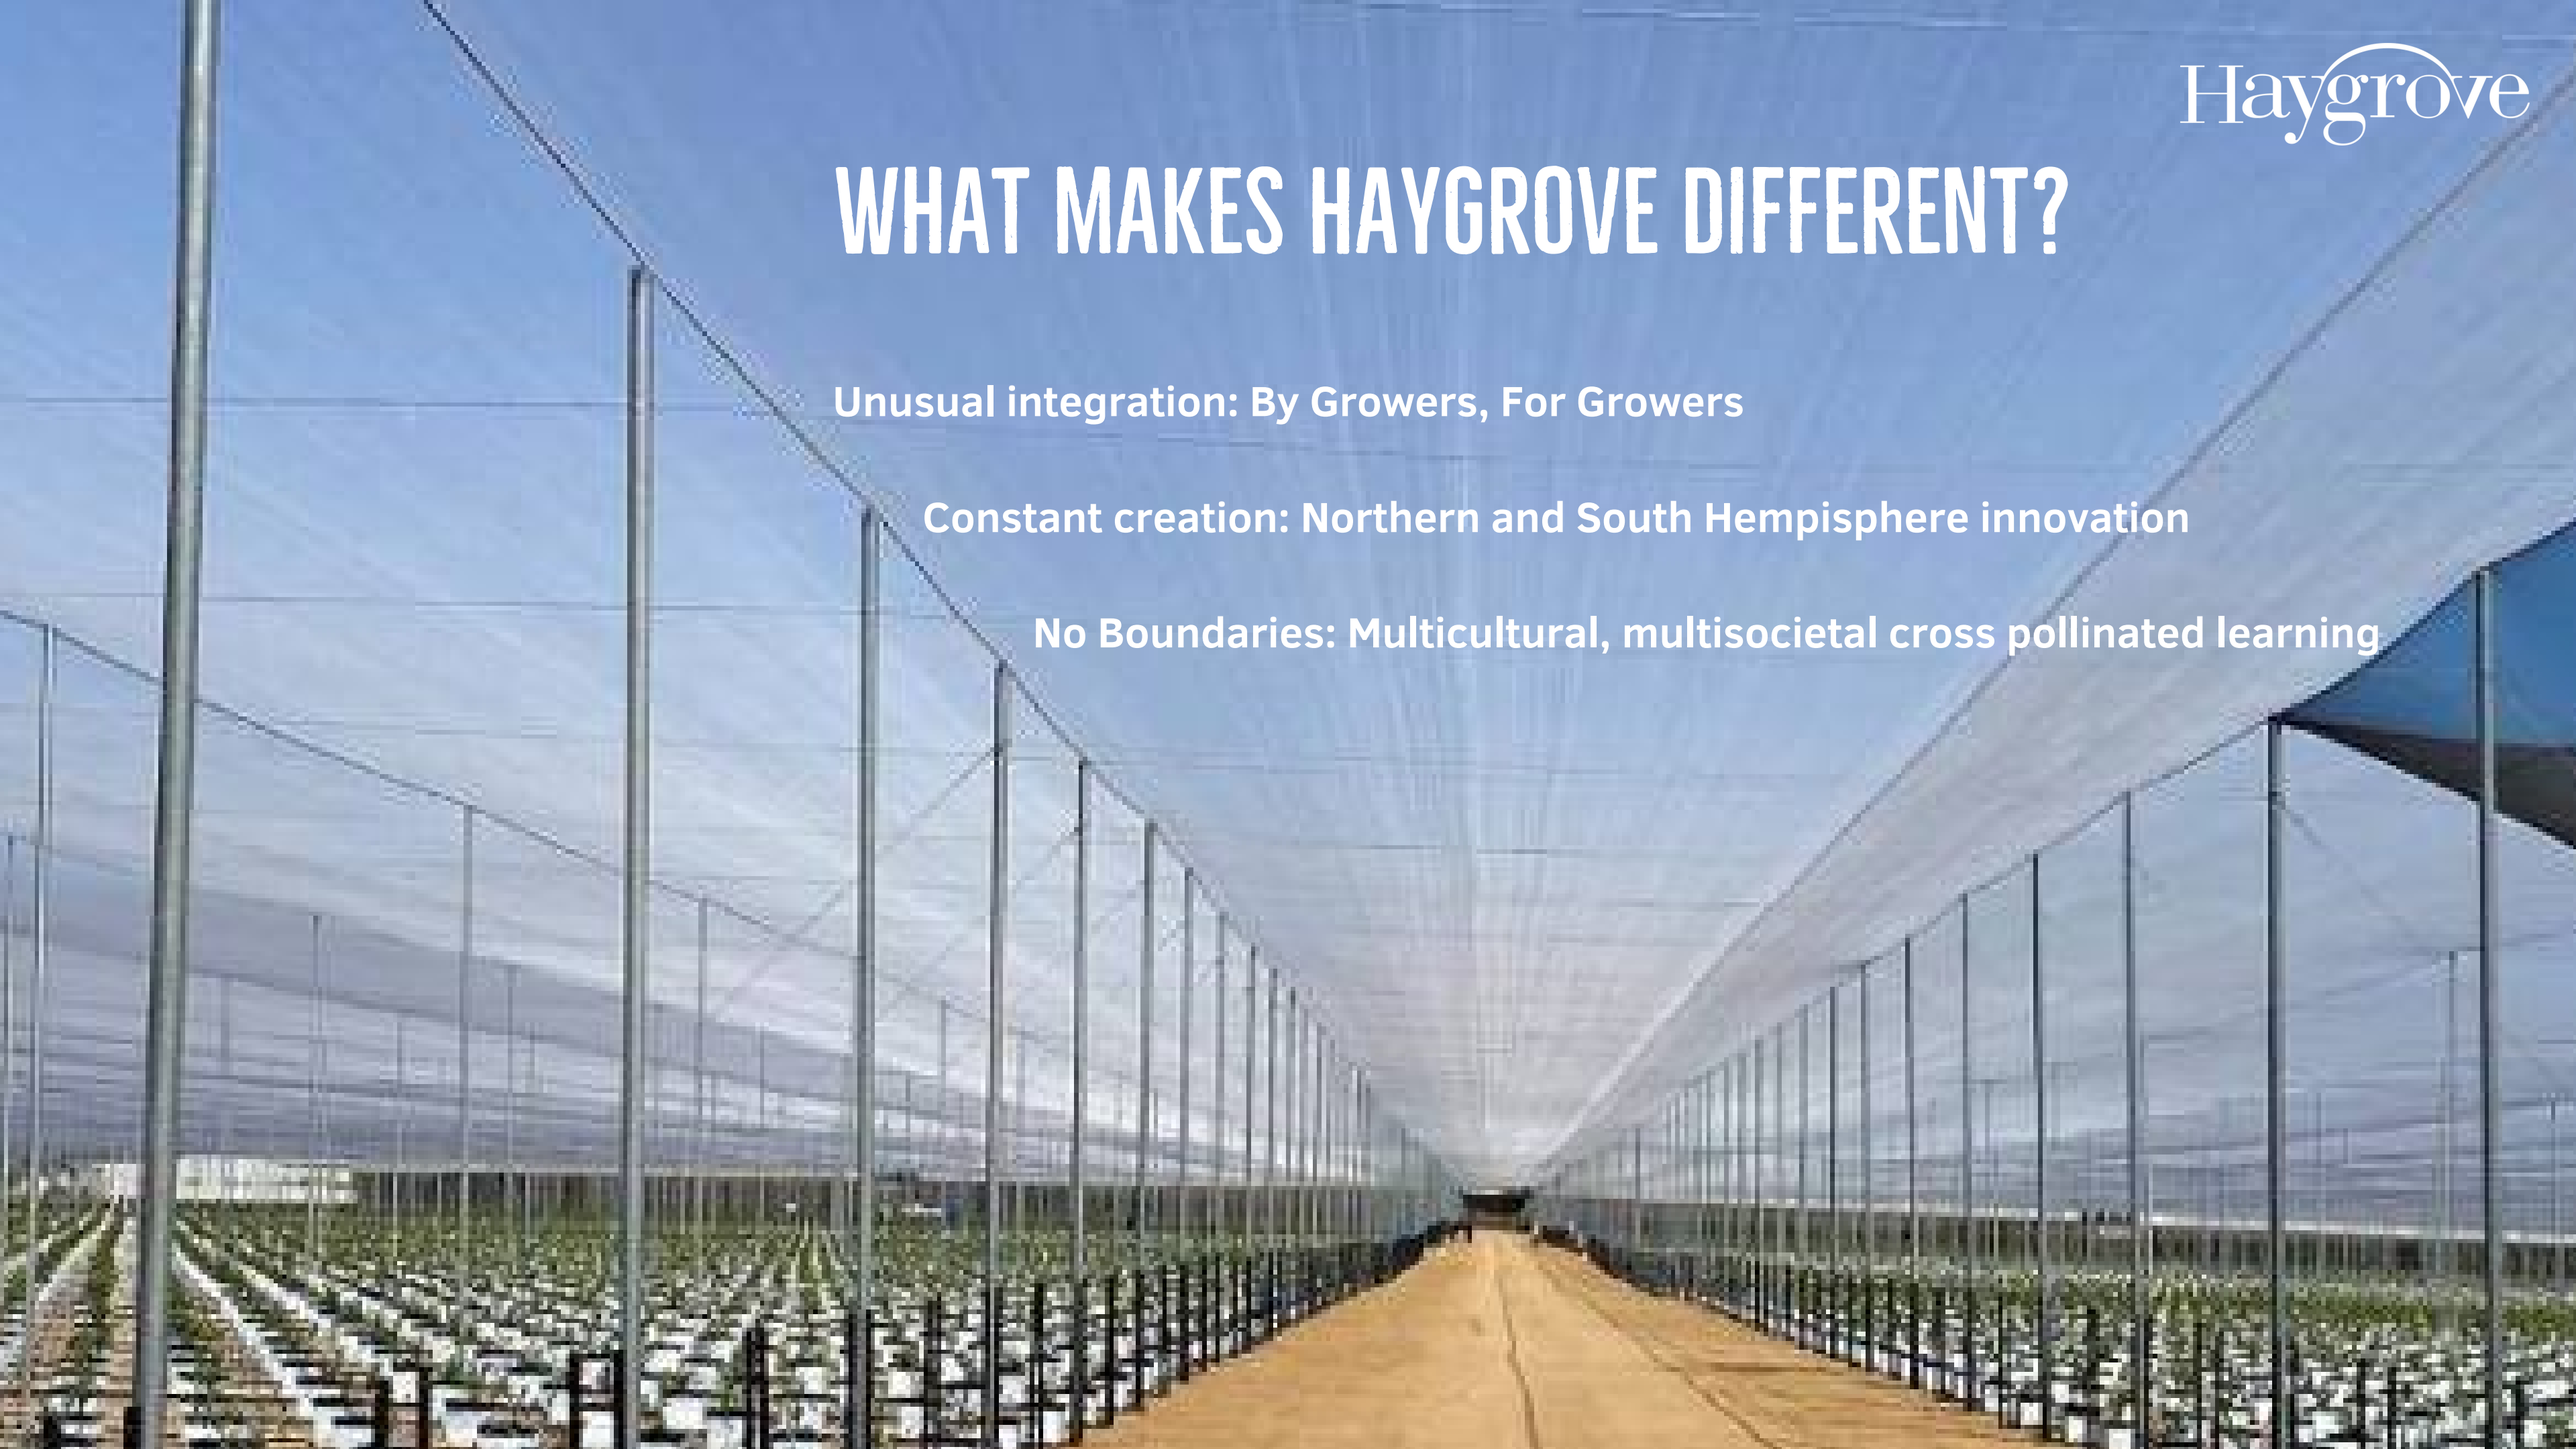

We are carbon neutral!
600+ Full time employees
3000+ Seasonal workers
£100+ million turnover
Angus, the Eccentric Chairman, is still leading the charge, with pace!

WE HAVE FARMS AND OFFICES LOCATED ACROSS THE GLOBE

And supply Growing Systems into over 50 countries

WHAT MAKES HAYGROVE DIFFERENT?

Unusual integration: By Growers, For Growers

Constant creation: Northern and South Hempisphere innovation

No Boundaries: Multicultural, multisocietal cross pollinated learning

GROWING SYSTEMS

OUR GROWING SYSTEMS

Haygrove

POLYTUNNELS

Enabling growers to increase yields, improve quality, maximize cropping area, lengthen harvest periods and smooth production peaks

SUBSTRATE GUTTERS

Enabling growers to increase picking speeds, increase yield, increase water efficiency, improve pest & disease management and use permanent sites

CROP SUPPORT SYSTEMS

Enabling growers to increase picking speeds, increase yield and quality, reduce lateral damage and utilise the strength of the polytunnels to support the crop

HAYGROVE GROWING SYSTEMS

Profitable, functional and sustainable solutions

STRONG

Designed to suit a range of climates.
We use high grade HSO steel

INNOVATIVE

With 30 years experience, our engineers design for future challenges.
Many of the products are patented.

FIELD-SCALE

Glasshouse technology on a field scale
No concrete
No site levelling

INTEGRATED

Designed for maximum efficiency and crop output

UPGRADABLE

Option to retro-fit more advanced technologies such as automated venting and rainwater gutters
